

Knowledge: I'm a jr web dev making a website for a dentist, Keith Brown DDS. I'm near launching. Here are details as the website stands of today (April 10, 2024).

My tech stack is tailwind, react, nextjs (using the app router that is now in production and mainstream) and plan on deploying via vercel. Here is my JSON at the moment, some things could be redundant or unneeded though. {
